BREAST CANCER FALL UPDATE
CURRENT CONTROVERSIES 2014

IN PARTNERSHIP WITH:

BC CANCER AGENCY
UBC DEPARTMENT OF SURGERY
THE ROYAL COLLEGE OF PHYSICIANS AND SURGEONS OF CANADA

SATURDAY
OCT 18TH, 2014
FOUR SEASONS HOTEL
791 WEST GEORGIA
VANCOUVER, BC
EDUCATIONAL OBJECTIVES

Upon completion of the course, participants will be able to do the following:

• Understand the heterogeneity of breast cancer and how that may influence treatment.
• Interpret the current evidence regarding margins and be able to critically determine best treatment approach for patients.
• Contrast the margin guidelines and differing patterns of care in the jurisdictions highlighted.
• Evaluate the controversies around screening mammography and define the appropriate pathways for diagnostic studies.
• Fully comprehend why synoptic reports are vitally important to improving patient care.
• Describe the process for patient reconstruction.
• Choose appropriate surgical management for the axilla, in breast malignancy.
• Differentiate the role of neoadjuvant therapy in the management of breast cancer.
• Assess the surgeon’s role in neoadjuvant chemotherapy.
• Describe the current place of radiotherapy in the primary treatment of breast malignancy.
• Indicate the best approaches to the clinical management of controversial breast cancer clinical scenarios.

ACCREDITATION

This event is an Accredited Group Learning Activity eligible for up to 7.25 Section 1 credits as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada. This program has been reviewed and approved by UBC Division of Continuing Professional Development.

PLANNING COMMITTEE

Dr. Chris Baliski     Interior Health
Dr. Elaine McKeivitt  Providence Health
Dr. Rebecca Nelson    Fraser Health
Dr. Christine Simmons Vancouver Coastal Health
Dr. Laurence Turner  Committee Chair, Fraser Health
Dr. Rebecca Warburton Providence Health
Dr. Lorna Weir       Vancouver Coastal Health

Please note that in an effort to be environmentally responsible, printed copies of the presentations will not be provided for this conference. However, the presentations will be posted on the SON website after the event at http://www.bccancer.bc.ca/HPI/SON/CME.
Dr. Sam Aparicio

Dr. Samuel Aparicio is the Nan & Lorraine Robertson Chair in Breast Cancer Research and a Canada Research Chair in Molecular Oncology at the University of British Columbia and the BC Cancer Agency in Vancouver, Canada. He is also Head of the BCCA’s Department of Breast and Molecular Oncology, and a Professor in the Department of Pathology and Laboratory Medicine at UBC.

Dr. Aparicio graduated in medical and natural sciences from Cambridge University (UK), clinical medicine from Oxford, and subsequently in internal medicine and pathology. His research programme encompasses the fields of cancer genomics, mouse genetic models, high throughput screens, and translational breast cancer research. His most recent work on the molecular taxonomy of breast cancer led to identification of new genes that could change the way breast cancer is diagnosed, and form the basis of next-generation treatments. Dr. Aparicio is also interested in tumour heterogeneity, and is involved in developing genomically and clonally characterised xenograft models of breast cancer.

Dr. Chris Baliski

Dr. Chris Baliski is a surgical oncologist in Kelowna at the BCCA-CSI (Centre for the Southern Interior). He is the Acting Head of the Surgical Oncology Network and also participates in the Breast, Melanoma, and Endocrine Tumor Groups. Areas of clinical and research interests are focused on breast, melanoma, and endocrine oncology.

Dr. Jean-Francois Boileau

Dr. Jean-Francois Boileau is a surgical oncologist and clinician scientist at the Montreal Jewish General Segal Cancer Centre. He is assistant professor in the Department of Surgery and associate member of the Department of Oncology at McGill University. He has worked as staff surgeon at the Centre Hospitalier Universitaire de Montreal (CHUM) and at the Sunnybrook Odette Cancer Centre in Toronto before transferring to his current position.

His research interests are in breast cancer and clinical trials. The main focus of his research aims at using primary systemic therapy, or neoadjuvant therapy, as a more efficient way to study the effects of treatments in women with breast cancer.

Dr Boileau is the principle investigator of the SN FNAC Trial, a Canadian multicenter study evaluating the accuracy of sentinel node biopsy in node positive breast cancer patients following neoadjuvant chemotherapy. Other research interests include the identification of better predictors of response to neoadjuvant chemotherapy and early detection of breast cancer.

Dr. Michelle Goeke

Dr. Michelle Goecke is a General Surgeon in the Fraser Health Authority and a Clinical Assistant Professor in the Division of General Surgery at the University of British Columbia. She is a member of the Surgical Oncology Network Breast Tumour Group. Her interest is in quality improvement issues in breast health. Her current focus is on the establishment of a Centre for Breast Health at Royal Columbian Hospital.
Dr. Malcolm Hayes joined the BCCA in 1993 and is a pathologist. He has a special interest in breast pathology.

Dr. Sheina Macadam is a Clinical Assistant Professor with the Division of Plastic Surgery at the University of British Columbia. She is active in both clinical and research-oriented work within the division. Dr. Macadam has completed a Masters of Science in Epidemiology and Research Design at the Harvard School of Public Health and is a funded Clinician-Scientist Investigator at UBC. Her interests include breast reconstruction outcomes, patient satisfaction, breast cancer care and epidemiological trends in breast reconstruction. Her current focus is a CBCF grant funded, multi-center study comparing patient outcomes and satisfaction between the five types of autologous breast reconstruction.

Dr. Elaine McKevitt is a General Surgeon at Providence Health Care in Vancouver. She did her medical training and general surgery residency in British Columbia. Her practice is focused at Mount Saint Joseph Hospital and she is part of the Mount Saint Joseph Breast Program and Rapid Access Breast Clinic.

Dr. McKevitt also holds a Masters degree in Education, UBC, and was recently appointed as the chair of the Surgical Oncology Network Continuinf Professional Development and Knowledge Translation committee. As member of the SON CPD-KT committee and Breast Surgical Tumour Group, Dr. McKevitt was a Lead on the SON Breast Cancer Synoptic Operative Report initiative.

Dr. Christine Simmons is a medical oncologist at the BCCA Vancouver Centre. She completed her medical oncology training at the University of Toronto and fellowship in Locally Advanced Breast Cancer at PMH in Toronto. She completed a Masters in clinical epidemiology from the University of Toronto during her fellowship. Her areas of clinical and research interest are the management of Locally Advanced Breast Cancer and streamlining the pathways of care for patients. She also is very focused on improving connections amongst all clinicians involved in the treatment of cancer patients, and has created Women in Cancer/All in Cancer, a not-for-profit organization which focuses on improving the connectedness of this field. She is involved in education as well, and has recently been appointed clinical skills course director for the second year medical students at UBC.

Dr. Rebecca Nelson is a Plastic and Reconstructive Surgeon in Fraser Health Authority, with a practice focus on breast reconstruction and treatment of skin malignancies. She completed fellowship training at Memorial Sloan-Kettering Cancer Center in 2011, and a Masters of Science in breast cancer genetics in 2004. She is currently a Clinical Instructor at the University of British Columbia, as well as a mentor for UBC medical students. Her research interests include access to reconstruction for breast cancer patients, and the costs associated with different types of reconstruction.
Dr. Scott Tyldesley is a Radiation Oncologist practicing at the BC Cancer Agency and Clinical Associate Professor in Radiation Oncology at UBC. His areas of expertise include radiation oncology (genitourinary, breast); health policy, health services research and needs assessment. He is a Michael Smith Foundation Scholar in health services research and has over 80 publications in health services research related to radiation oncology. Dr. Tyldesley is a Co- principal investigator on the Canadian Institute of Health Research funded team for Operations Research in Cancer Care, which is a collaboration between clinicians and administrators at the BC Cancer Agency and operations research scientists at the Sauder School of Business at UBC. He is also the chair of the BC Cancer Agency’s Breast Outcomes Unit. He has over 15 years of clinical experience in the management of breast and genitourinary malignancies.

Dr. Rebecca Warburton is a Breast Surgical Oncologist and General Surgeon with Providence Health Care in Vancouver. Her primary site of practice is Mount Saint Joseph Hospital. She completed her medical training and general surgery residency at the University of Saskatchewan. She then continued her oncology training at the University of Toronto as a fellow in the subspecialty of Breast Surgical Oncology. She has presented her breast cancer research internationally and is one of the authors of the U of T Manual of Surgical Oncology. Dr. Warburton is a member of the Breast Surgical Tumour Group with the BC Surgical Oncology Network.

Dr. Christine Wilson is the Medical Director of the Screening Mammography Program (SMP), a population-based screening program operated by the BC Cancer Agency. Dr. Wilson is a radiologist and Fellow of the Royal College of Physicians of Canada, having obtained her medical degree from the University of Saskatchewan. With over 30 years of clinical experience, she is well known for her work in breast imaging. She currently practices Breast Imaging at the BC Cancer Agency, Vancouver Centre and is the Medical Practice Lead for Breast Imaging for the Lower Mainland consolidation. She is a clinical associate professor at the University of British Columbia. She played an active role in the Provincial Breast Health Strategy and chaired the Provincial Breast Health Clinical Pathway project. She now Co-chairs the Lower Mainland Breast Imaging Hub committee, and is a member of the Provincial Breast Health Steering Committee and DAP’s Diagnostic Mammography committee.
Dr. Frances Wright

Dr. Frances Wright joined Sunnybrook’s Division of General Surgery and the Institute of Health Policy, Management, and Evaluation (University of Toronto) in 2004. She is a surgeon and investigator, with a focus on translating evidence into practice in surgical oncology. She has since published over 75 manuscripts relating to the quality of cancer care and has been the recipient of over 20 peer-reviewed grants from a variety of funding agencies including CIHR, NIH, NCIC, and the Canadian Breast Cancer Foundation.

Much of this early activity led to her work in developing the standards for multidisciplinary cancer conferences, which have been adopted by Cancer Care Ontario. She currently is a co-chair of the provincial Melanoma Disease Site Group, and the Physician Lead for Multidisciplinary Cancer Conferences with CCO.

Dr. Wright has also been recognized for her excellence in both undergraduate and postgraduate education and now serves as the Program Director for the University of Toronto General Surgical Oncology Fellowship and has recently been appointed as the Surgical Head of Breast Cancer and Melanoma at Sunnybrook Health Sciences Centre.
